

Q Professional measuring tape

greenteQ Professional measuring tape with a reinforced blade to allow for considerable extension without bending.

Properties:

Q

The greenteQ Professional measuring tape has a reinforced blade that does not bend even after considerable extension. The ergonomically formed and rubber-coated housing allows the greenteQ Professional measuring tape to be held securely during use. It is made of impact-resistant ABS plastic. The flexible belt clip makes it easy to attach to your belt or trousers. The greenteQ Professional measuring tape has an automatic locking mechanism and a manual retracting function with a twin release button to allow for operation in any position. The blade widths of 16, 19 and 25 mm allow you to maintain a good overview when reading the measurements. The end hook is made of stainless steel and is flexible. This allows the product to be securely hooked in position and enables true zero measurements when pressed against objects. The robust spring allows the extremely strong and curved steel strip to be retracted in a controlled manner.

- Product advantages:**
- Class II accuracy
 - No bending even after considerable extension
 - Twin release button
 - End hook flexibly perforated
 - Automatic locking mechanism
